# Vested interests Zimbabwe: Robotics Packages

Vested interests pricing is designed for everyone. Depending on your budget as well as the level you want to be involved in with robotics. There are four available packages and each package is designed to fill your needs. Payment is only done once and you become a full life time member!

As vested interests we cater for whatever reason you are taking this course, whether you just interested and just curious in knowing how to make a mini robot or you actually want to make a living off the things you are learning, everything is available!

Please keep reading the Packages and their prices are listed at the end of this Document.

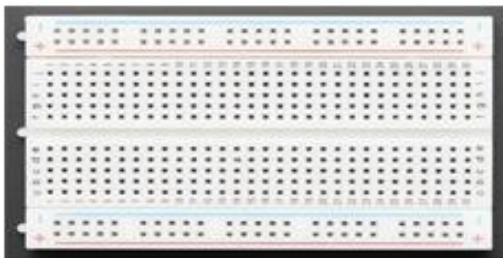

## The first package (Bronze Package)

This is designed solely for those with a small budget and also those who just want to take a peek in the robotics world to see how things go. It will however not allow you to join the life time membership offered by Vested Interests. For students in high school however it's not the end, one can achieve a life time membership by inviting another student or person, this will allow the student to have full access to Vested Interests Zimbabwe membership benefits.

## The second Package (Silver Package)

This is designed to those who want to upgrade their skill level, adding on to their CVs and life skills. With the notion that these would want to take robotics further, they get a full Life time membership to Vested Interests Zimbabwe, they will get the benefits of being a vested interests member (please keep reading to see the benefits of being a member of the Vested interests Member). They get a free Robotics Home Practice kit valued at \$21 consisting of Arduino Uno Board, CD of tutorials, Bread board, Arduino Cable, 5 LEDs, 5 Resistors and connecting Wires. This will allow the individual to practice what they learn in the class and explore more options

### The third Package (Gold Package)

This is designed for people who not only want to learn the basics but want to do more with robotics, they intend to go deeper than the simple robotics. Vested interests will not only allow them the full life time membership but also assist them on the projects they decide to do. They will be supported and given access to the educational projects done by vested interests for them to learn or adopt the things from the knowledge. They will get further in depth knowledge to programming and also deep electric circuitry.

### The fourth and last package (Platinum)

This is the advanced package that allows the individual to get all the access to all the services provided by vested Interests Zimbabwe. They are given a Robotics Teacher Starter Kit and given teaching tools and aid should they decide to teach other students. On top of that they are given a license to be able to sell the vested Interests Products, these products may include Arduino boards, bread boards etc., and they would get a percentage of the sales. They will be full members and also have access to educational projects done by vested interests and will also get support should they decide to start their own projects.

They have the choice of also being part of the Vested Interests Zimbabwe Elite team of Experts. Please stay tuned as we will further explain this section of vested interests. But in a nutshell we intend to create a database of Knowledge that everyone can learn from!

This Elite team works together to solve local Zimbabwean problems as well as the world, using modern technology. Each year from now on will be posting 5 Big Projects that anyone would like to solve. Each project will have its own designated amount that one can win if they have the best solution to the problem.

This year's problems have not been posted as yet because Zimbabwe as a lot on its plate but as soon as the elections are carried out and the environment is stable enough we will post them. This year the Price Money for each Project will be expected to be \$5000+, so stay tuned. Vested interests will Post the problems and the amounts they each have. The projects are meant for everyone! However one can fully benefit if they are a member of the vested interests community!

## What does it mean to be a member of vested interest Zimbabwe?

Once you have paid any package from the Silver Package and above you become a full Life time Member of vested Interests Zimbabwe. No more other payments of membership are required in the future. This would mean that you will benefit on sales and discounts offered only to vested interests members. And also you get to join our Robotics competitions at lowed entry prices with a chance to win huge amounts.

On top of the competitions you get to benefit from other free products that only members can access. For higher packages Vested interests will be offering support to projects you decide to partake meaning you will have access to an endless pool of knowledge as well as advice and mentorship from expertise in the field. Again vested interests will give you the opportunity to network with some of the bright minds as well as ideas that will be already in the community.

## Services offered by each Package

Service	Bronze Package cost \$23	Silver Package Cost \$50	Gold Package Cost \$75	Platinum Package Cost \$105
FREE first Lesson(introduction to robotics and its benefits)	✓	✓	✓	✓
FREE Mobile Android and iOS app	✓	✓	✓	✓
FULL Simple Robotics Course	✓	✓	✓	✓
FULL life time membership	✗	✓	✓	✓
Discounts and Sales on Vested interest Products and Services	✗	✓	✓	✓
FREE Robotics Home Practise Kit(Arduino uno board, CD of Tutorials, Bread Board, Arduino Cable, 5 LEDs, 5 Resistors and Connecting Wires, Valued at \$21)	✗	✓	✓	✓
